PURPOSE FOR WHICH THE GRANT PROGRAM FUNDS WILL BE USED:

The NJCBIR will fund Multi-Investigator Project grants to support collaborative research from at least 4 investigators from independent laboratories within the same institution or among laboratories from different institutions with an emphasis on neural repair and regeneration after traumatic brain injury. All qualifying institutions in the State of New Jersey may apply. Preference will be given to proposals that demonstrate complementary approaches to addressing a research question through multidisciplinary investigations (e.g., molecular, genetic, physiologic and pharmacologic approaches). Proposals must identify a principal investigator within each research site as well as an overall Principal Investigator who is responsible for ensuring collaboration among all investigators.

AMOUNT OF MONEY IN THE GRANT PROGRAM:

Applicants are encouraged to apply for a one-year or two-year award. Maximum funding is up to \$1,000,000 per year including direct and indirect costs (10% maximum for the latter). Two-year awards are made through one-year contracts. Each funding award within the two-year period will be contingent upon the availability of funds. Second-year support for all Multi-Investigator Project grants is contingent upon submission and approval of a comprehensive progress report. All progress reports must be favorably reviewed by an independent scientific merit review panel and recommended to the NJCBIR for continued funding. Awards will begin on or about April 16, 2007. The NJCBIR reserves the right to distribute funds among the grants in this program 07-BIR-2 as well as among the NJCBIR's other grant program 07-BIR-1. The NJCBIR reserves the right not to fund any grants in this program 07-BIR-2 to the maximum amount, or not to fund any grant in this program at all.
